“

*Don't own a cafeteria,
let a food company do it.*

*It is understanding
where your real value is
and putting your best people
and resources behind it.*

”

Jack Welch
former GE Global CEO

ABOUT

The WERCS provides leading and comprehensive software tools and services for GHS SDS Authoring and Distribution, Retail and Industrial Manufacturing Supply Chain Compliance Solutions as well as Green Chemistry and Sustainability Solutions that help advance the health and safety of the environment in which we work and live.

After nearly 30 years in operation, in November 2013, the Wercs became part of the UL family, a trusted company, with a 120 year tradition and over 150

offices around the globe whose principles are rooted in science and dedicated to innovation for complex global supply chain challenges, holistically and efficiently.

Today, WERCS products and services are considered the gold standard in global regulatory and sustainability compliance solutions.

Customer Inquiries

Global regulations are increasing faster than most businesses are able to understand and comply.

When mistakes occur, companies can face penalties, litigation, and reputation damage that result in lost revenue.

UL can help.

The Wercs®

Regulatory Assurance Program

- ✓ Increase quality and accuracy
- ✓ Speed to market: decrease turn-around time
- ✓ Mitigate risk by sharing liability with UL, the most trusted name in safety science
- ✓ Access to world class expertise
- ✓ Reduce operational expenses

What happens when...

Your product shipment overseas misses its deadline because it was held in customs due to an improper classification on your SDS?

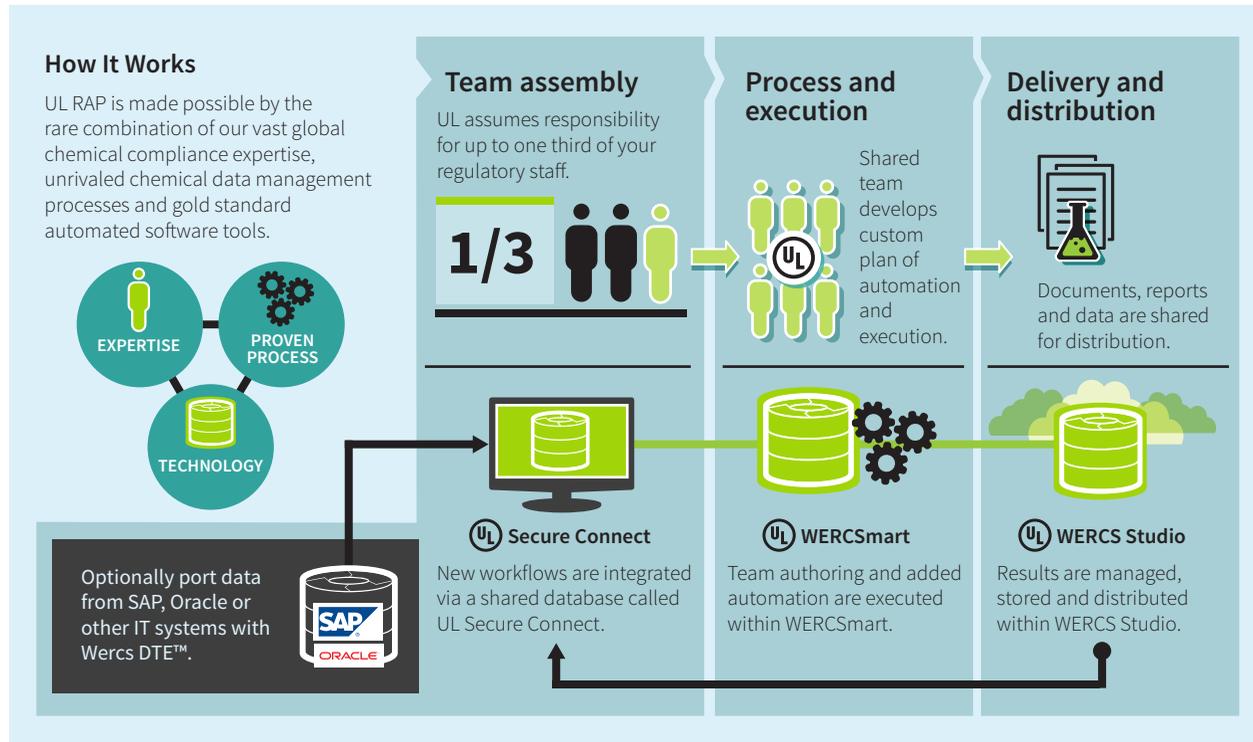

- a. Loss of revenue and potential future sales
- b. Disgruntled customer
- c. Damaged reputation
- d. All of the above

Challenges

- Growing in both number and complexity, regional/international regulations strain regulatory departments, compromise quality control and increase risk and liability for non-compliance
- Cyclical regulatory demands, like GHS, frequently force regulatory departments to scale up or scale down staff resulting in unpredictable department costs
- Shortages of regulatory professionals result in companies compromising the regulatory skills required when hiring new talent
- Regulatory departments are non-revenue generating and are a cost of doing business

UL can help.

The **UL Regulatory Assurance Program** offers clients the most efficient, accurate and cost effective approach to managing global chemical compliance with the added benefit of shared liability with the most trusted name in safety science.

Advantages

- Reduce distractions and focus on business goals
- Serve customers better with faster, higher quality, professional results
- Ensure compliance
- Gain competitive advantage through rapid turn-around
- Reduce risk by participating in Safe Harbor of regulatory methods used in WERCSmart
- Enhance reputation by affiliating with UL while also gain access to industry's best professionals
- Flexibility to scale up or down with minimal impact on infrastructure
- Stabilize the cost of compliance
- Save money by headcount reduction and dropping in-house EH&S software license, maintenance and IT costs
- Efficient Interfacing with customer systems (i.e. Oracle, SAP)

The Wercs custom automation can author hundreds of Safety Data Sheets for any Regional Format around the globe spanning 46 languages in very short time frames.
